

1.Reverse a number

The screenshot shows an IDE with a C++ program to reverse a number. The code is as follows:

```
1 #include <stdio.h>
2
3 int reverseNumber(int num, int rev) {
4     if (num == 0)
5         return rev;
6     else
7         return reverseNumber(num / 10, rev * 10 + num % 10);
8 }
9
10 int main() {
11     int number, reversedNumber;
12
13     printf("Enter an integer: ");
14     scanf("%d", &number);
15
16     reversedNumber = reverseNumber(number, 0);
17
18     printf("Reverse of the number: %d\n", reversedNumber);
19
20     return 0;
21 }
```

The console output shows the program running successfully with the input 567 and output 765.

```
C:\Users\PRANESH PREMUMAR\Desktop\Day 2 program.exe
Enter an integer: 567
Reverse of the number: 765
-----
Process exited after 3.361 seconds with return value 0
Press any key to continue . . .
```

The compiler output at the bottom shows no errors or warnings.

```
Compiler (3) Resources Compile Log Debug Find Results Console Close
- Errors: 0
- Warnings: 0
- Output Filename: C:\Users\PRANESH PREMUMAR\Desktop\Day 2 program.exe
- Output Size: 322.8212890625 KiB
- Compilation Time: 0.55s
```

2.Perfect number

The screenshot shows an IDE with a C++ program to check if a number is perfect. The code is as follows:

```
1 #include <stdio.h>
2 int main() {
3     int num, sum = 0;
4     printf("Enter a number: ");
5     scanf("%d", &num);
6     for (int i = 1; i < num; i++) {
7         if (num % i == 0) {
8             sum += i;
9         }
10    }
11    if (sum == num) {
12        printf("%d is a perfect number.\n", num);
13    } else {
14        printf("%d is not a perfect number.\n", num);
15    }
16    return 0;
17 }
```

The console output shows the program running successfully with the input 6 and output "6 is a perfect number."

```
C:\Users\PRANESH PREMUMAR\Desktop\Day 2 program.exe
Enter a number: 6
6 is a perfect number.
-----
Process exited after 13.31 seconds with return value 0
Press any key to continue . . .
```

The compiler output at the bottom shows no errors or warnings.

```
Compiler (3) Resources Compile Log Debug Find Results Console Close
- Errors: 0
- Warnings: 0
- Output Filename: C:\Users\PRANESH PREMUMAR\Desktop\Day 2 program.exe
- Output Size: 322.7041796875 KiB
- Compilation Time: 0.52s
```

3.

The screenshot shows the Embarcadero Dev-C++ IDE. The main window displays a C++ program named 'Day 2 program.cpp'. The code includes `<stdio.h>` and defines a `main` function. Inside `main`, there are three nested loops: an outer loop for `i` from 0 to 9, a middle loop for `j` from 0 to 4, and an inner loop for `k` from 0 to 2. Each loop iteration prints a message: 'Big O Notation Example' for the outer loop, 'Omega Notation Example' for the middle loop, and 'Theta Notation Example' for the inner loop. The program returns 0.

The output window shows the execution results, displaying the three messages for each of the 10 iterations of the outer loop. The process exited after 0.06231 seconds with a return value of 0.

The compiler window shows no errors or warnings. The output filename is 'C:\Users\PRANESH PREMUMAR\Desktop\Day 2 program.exe', the output size is 322,612,304,6875 KiB, and the compilation time is 0.55s.

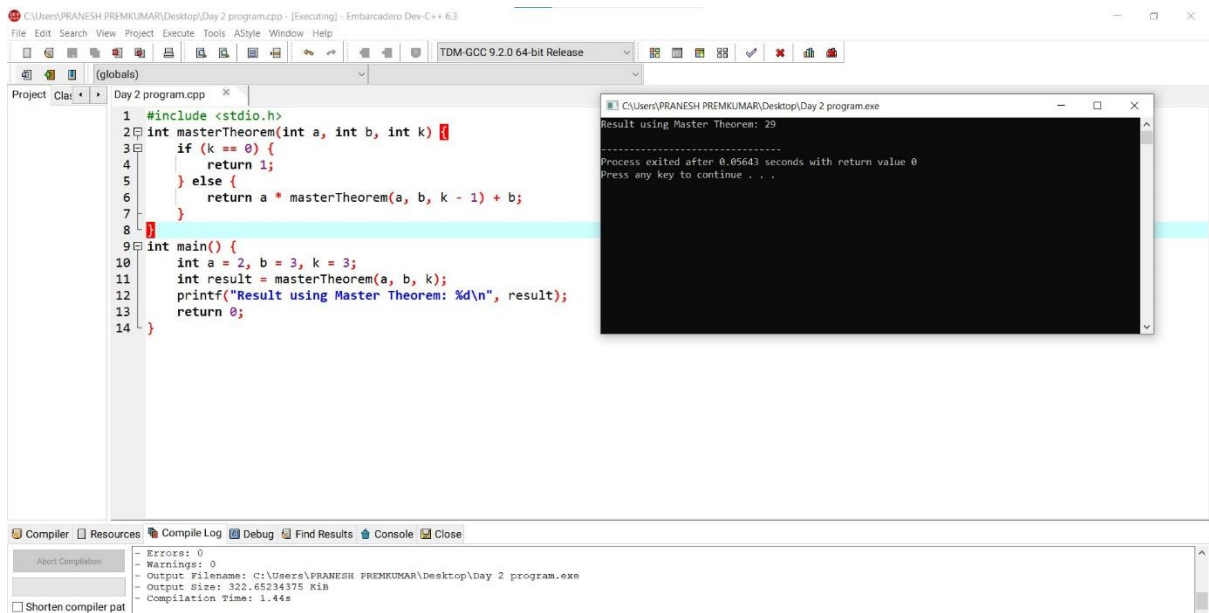

4.

The screenshot shows the Embarcadero Dev-C++ IDE. The main window displays a C++ program named 'Day 2 program.cpp'. The code includes `<stdio.h>` and defines a `main` function. It also defines two recursive functions: `nonRecursiveFactorial` and `recursiveFactorial`. The `nonRecursiveFactorial` function uses a loop to calculate the factorial, while the `recursiveFactorial` function uses recursion. The `main` function calls both functions with the value 5 and prints the results.

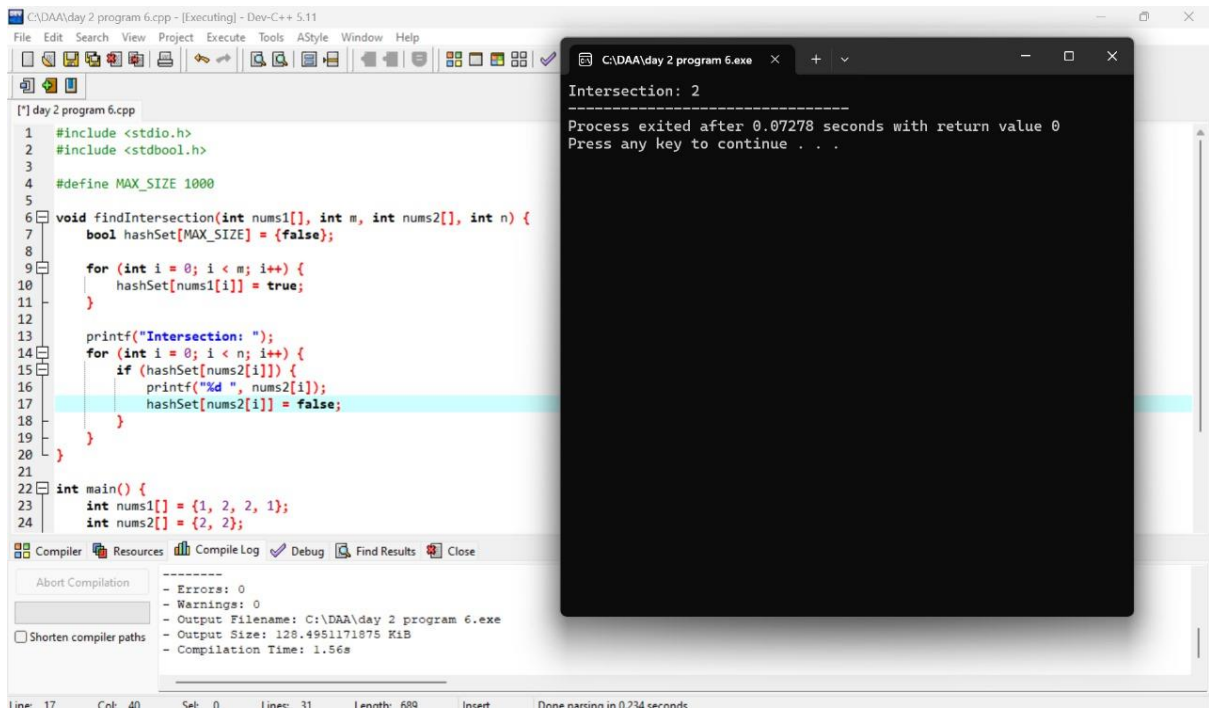

The output window shows the execution results, displaying the output of both functions: 'Non-recursive factorial of 5 is: 120' and 'Recursive factorial of 5 is: 120'. The process exited after 0.05293 seconds with a return value of 0.

The compiler window shows no errors or warnings. The output filename is 'C:\Users\PRANESH PREMUMAR\Desktop\Day 2 program.exe', the output size is 322,699,21875 KiB, and the compilation time is 0.47s.
